+38162236148

Innovative specialist with experience building and maintaining web in the financial industry. Passionate about usability and attractiveness. Throughout my career I've focused on developing scalable and well documented code.

Work Experience

Technical Writer

Finstar Financial Group

May 2022 to Present

Finstar Financial Group is an international private investment advisory company with around US\$2 billion of assets under management.

Company site: <https://www.finstar.com>

My responsibilities:

- Development of technical documentation in English for information, methodological and marketing purposes, operational documents (technical specifications, manuals for users, administrators, managers, etcetera) in a web format with using HTML, CSS and JS.
- Styling documentation for marketing purposes.
- Interaction with analysts and developers as part of the development of technical and operational documentation.
- Analysis and updating of existing documents.
- Description of technical solutions from the point of view of an information technology specialist together with analysts and developers.
- Development of business process models together with analysts.
- Maintaining and updating the knowledge base within the company.

Thanks to my work and personal qualities, I am the first technical writer in the history of the company. I created a document package from scratch and keep it up-to-date in accordance with the development of software.

Documents are developed in a web format and, if necessary, are additionally converted to PDF format. If necessary, I perform work in an accelerated mode to satisfy customers, for which I have repeatedly received gratitude from my management.

Technical Writer

YADRO

February 2021 to April 2022

YADRO is focused on creating highly efficient technologies and innovative hardware platforms.

Company site: <https://yadro.com>

My responsibilities:

- Development of a diverse set of documentation for hardware and software systems.
- Participation in the use of best practices and tools to ensure the quality and relevance of technical documentation.
- Conducting reviews to ensure the documentation quality.
- Productive interaction with major customers: production, product managers, marketing.

I developed API documentation for the first time in the history of the company and participated in the implementation of automation for translating documents into other languages.

Technical Writer

Factory of Information Technology

May 2019 to January 2021

Factory of Information Technology (FIT) is an IT company developing technologies, products and solutions for smart cities.

Company site: <http://fabit.ru>

My responsibilities:

- Development of documentation for automated systems, software and hardware-software complexes.
- Paperwork using government and corporate standards.
- Participation in the development and maintenance of the company's products at all stages of the life cycle in terms of documentation.
- Participation in testing the developed software products in terms of the description of test methods and configurable parameters.
- Interaction with technical specialists on the development of documentation.

Process Engineer

Petrochemical Engineering

September 2018 to March 2019

Petrochemical Engineering is a design institute that develops documentation for equipment for the petrochemical industry.

Company site: <http://www.nhibel.ru>

My responsibilities: development of documentation for equipment for the petrochemical industry in AutoCAD.

Design Engineer

Russian Helicopters

June 2017 to May 2018

Russian Helicopters is one of the world leaders in the civil helicopter industry.

Company site: <https://www.rhc.aero/en/>

My responsibilities: development of documentation for energy systems, equipment repair control, checking the efficiency of systems.

Education

Bachelor's Degree in Energy supply of enterprises

Belgorod State Technological University

September 2011 to June 2015
